CHICAGO HALLUCINATION ASSESSMENT TOOL

Preliminary Questions

These preliminary questions may be asked if the CHAT is being used outside the context of a full diagnostic interview. These questions may help to build rapport and to put the interviewee's experiences into context.

1. How good is your mood today on a scale of 1 to 4?
2. On a scale of 1 to 4, how stressful has your day been so far?
3. How are you feeling today, physically, on a scale of 1 to 4?
 - 3a. [If less than 4 and not specified]: What kinds of things are bothering you?
4. Have you ever been diagnosed with a neurological condition?

P2. Medications

1. When did you first take antipsychotic medications (show list)? Have you tried many different medications on this list? Which ones?

Drug	Months/Years Taken	Last Taken

2. Do you feel like medication has been helpful to you? If so, how?

P3. Substance Abuse History

Have you ever used any other types of drugs? Street drugs? Medications not prescribed to you?
